

# GSHV Gold Series® High Vacuum Dust Collector for High Pressure/Vacuum Applications

**High Vacuum Dust Collector** can be used in applications up to 17 in Hg or 8 psi positive pressure. Common applications include central vacuum systems, positive or negative product receivers and high pressure bin vents.

## Standard Features & Benefits —

- Heavy duty 10 and 7 gauge construction
- Vessel strength: 17 in Hg vacuum, 8 psi positive pressure (without explosion vent)
- Flanged, tangential inlet minimizes dust contacting the filters
- Two models available:
  - GS2HV (2-cartridge design)
  - GS4HV (4-cartridge design)
- Can be configured as a stand-alone dust collector or without hopper and support structure for bin vent applications
- Pulse-cleaning system includes field-mountable, solid state control panel

## Options —

- Horizontal explosion vent
- Bag-in bag-out filter access door for pharmaceutical/hazardous dusts
- Continuous liner discharge for pharmaceutical/hazardous dusts
- Discharge collection devices such as a 55-gallon drum or self-dumping hopper.
